

Reject petition 04-160
To whom it may concern,

Having been an avid listener of radio my whole life I cannot express in words the enjoyment that XM has brought to our family. Great kids programming, great music, news and sports....and so much more. It's time for us to evolve and embrace the future. Local radio with all its commercials and silly promotion cannot compete with the technology available to the satallite listener. This issue, needs to be resolved. As the technology increases so will the content. Put an end to Petition 04-160 and let us enjoy the wonderful offerings of satallite radio. Thank you for your time.
